EDUCATION

The University of Georgia, Franklin College of Arts and Sciences

Athens, GA

Bachelor of Science, Computer Science

May 2027

- 3.6 GPA
- Dean's List
- Relevant Coursework: Data Structures, Systems Programming, Software Development, Discrete Math

TECHNICAL SKILLS

- **Languages/Technologies:** Java, HTML, CSS, JavaScript, Typescript, C, Python, Svelte, Spring, jQuery, SQL
- **Programming Expertise:** Full-Stack Web Development, Parallel Programming, CI/CD Pipeline
- **Development Tools:** Git, Jira, UNIX, VS Code, Eclipse, Emacs, MySQL
- **Other Skills:** Blender (3D Graphics Software)

WORK EXPERIENCE

Full Stack Developer

CresCuts, Athens, GA

August 2024 – Present

- Architected and developed crescuts.com, a responsive barbershop booking platform using SvelteKit and TypeScript, implementing dynamic video backgrounds optimized for various devices
- Designed and integrated a secure contact system using Nodemailer, resulting in 40% reduction in administrative overhead through automated email notifications
- Created an interactive booking system featuring real-time availability checking, automated time slot management, and email confirmation functionality
- Deployed and maintained the application on AWS, implementing best practices for high availability and optimal performance.

Software Engineering Intern

March 2024 – June 2024

Tatum Games LLC, Remote

- Contributed to MIKROS, a SaaS product for game developers' data pooling and user behavior insights.
- Implemented new features using JavaScript and jQuery, increasing user engagement by 20%
- Collaborated with cross-functional teams to integrate front-end and back-end components
- Participated in code reviews, providing and receiving constructive feedback to improve code quality
- Gained Agile development experience, completing 100% of assigned tasks within two-week Sprints

PROJECTS

AI-Powered DAW (Digital Audio Workstation)

- Implemented complex audio processing pipeline using Web Audio API and custom rendering logic, enabling high-fidelity audio mixing and export functionality with support for 16-bit WAV format
- Integrated AI-powered audio generation system for creating custom beats and samples
- Developed modular component architecture using Svelte stores and custom events, enabling real-time track manipulation, automated scrolling, and dynamic track loading

Business Website Authentication System

- Built secure login system using Java, Spring Boot, and Spring Security
- Implemented robust security measures including JWT authentication and password encryption
- Developed robust RESTful APIs, to integrate the backend with the frontend I built with HTML, JavaScript and the Bootstrap Framework

EV Charger Finder Application

- Developed Charger Finder, an Electric Vehicle charging station locator app using Java and JavaFX
- Integrated APIs for geolocation and charging station data, enhancing user experience
- Gained expertise in handling asynchronous tasks and UI updates based on API responses
